

The Panini Vision X™ P check scanner, featuring two exit pockets, enables Panini customers to perform real-time document sorting in any distributed capture environment with the proven robustness, reliability, and scalability of the Vision X family of products.

Now, Panini customers have the added benefit of a high performance check scanner strategically designed with two exit pockets for sorting.

Panini's solutions leverage over 60 years of success in enabling clients to capitalize on shifts in the payments processing market.

We selected the Panini Vision X™ P to complete our distributed capture solution because it's a logical addition to the most reliable check scanner line in the industry.

Steve Creviston, President
C-Soft Imaging

Benefits

- Provides an additional capability for an already compelling business case for distributed image capture
- Sorting and printed text may be determined by MICR or image data
- Maintains the proven robustness and reliability of the Vision X family of products, providing the lowest Total Cost of Ownership
- Sleek design, quiet operation, and compact footprint
- Includes Panini's Advanced Graphic Printer (AGP) designed for receipt and validation printing

Vision X P Applications:

- Sorts On-us vs. Transit Checks
- Sorts On-us vs. Foreign Items
- Payment Coupons vs. Checks
- Checks Read vs. Checks Rejected
- Checks using ACH methods vs. Checks using Check 21 methods
- Accommodates other sorting requirements

Hardware Characteristics:

- Automatic Document Feeder available as Small Feeder (SF) at 50 documents per batch, or Full Feeder (FF) at 120 documents per batch
- Magnetic Reader – E13B/CMC7 featuring advanced MICR Plus® technology
- Rear Inkjet AGP (Advanced Graphic Printer) – 1, 2 or 4 line print capability, Reg CC Compliant
- 2 Exit Pockets – Capable of holding up to 120 documents in each pocket, pocket-full sensor available
- Panini Vision API
- USB 2 Interface with Cable
- Image Format – 100, 200, or 300 dots per inch (dpi), black and white & grayscale, BMP, TIFF, JPEG, and G4
- External Power Supply
- UL® Certified, FCC
- High Torque Motors

Software Characteristics:

- Utilizes the Panini Vision API and is software compatible with the complete Vision X product line
- Firmware upgradeable through the network from 50, 75 and 100 dpm, accommodating a broad range of transaction volume and processing time requirements
- Microsoft Vista™ Certified
- OCR Assist
- Automatic inkjet cartridge detection and ink level monitoring

“We selected the Panini Vision X™ P to complete our distributed capture solution because it’s a logical addition to the most reliable check scanner line in the industry,” says Steve Creviston, President, C-Soft International. “The Vision X scanner provides our customers with an additional exit pocket for sorting ‘non-check21’ cash letter items, on-us versus transit items, foreign items, payment coupons, and other documents. Distributed capture is a strategic investment for our customers, and the Vision X P allows us to offer a cost-effective, superior-quality solution with increased functionality to banking and payment customers.”

About Panini

Panini offers check capture solutions that help customers fully realize the advantages and efficiencies available with the digital transformation of the paper check. Panini’s scalable check capture solutions address the complete range of distributed check processing opportunities.
