

# Keeps you more organized, keeps your info more secure and loves HIPAA too.

## Introducing the Canon ScanFront 300/300P

In today's document-driven healthcare world, you need to be fast and efficient. That's why the Canon ScanFront 300/300P helps you be more HIPAA compliant by keeping all your patient info private and secure with electronic records. Combined with a fax server application to provide a full streamlined and secure solution, the ScanFront ensures efficiency and ease like never before. Not to mention a cleaner, more organized desk.

Reliable, efficient, and modern ...  
Canon's ScanFront 300/300P network scanner.

### ScanFront 300/300P Specifications:

- Auto Color Detect
- Skip Blank Page
- Mixed Size Originals
- Folio Mode
- Deskew
- Suggested Daily Duty Cycle of Approximately 2,000 Scans

### Cost Reduction

- Eliminate local and long distance fax charges by removing analog phone lines in conjunction with the fax server software
- Reduce costs by eliminating specialized fax hardware, paper, toners, and maintenance fees
- Increase ROI

### Security & Compliance

- All inbound and outbound "faxes" can be tracked and logged
- Create audit trails to facilitate regulatory compliance
- Sensitive documents are protected by delivery directly to authenticated recipient e-mail inbox, FTP, USB, Shared Folder, Fax/Printer

- Scan to multiple destinations simultaneously

### Productivity

- Easy to use, install, and administer
- Accelerate and streamline document management
- Increase employee productivity and efficiency—no longer refax or wait for fax transmission confirmation
- Replace illegible black and white faxes with high quality color scans
- Save time—IT can manage remotely
